Practice Quiz - SparkML concepts

Pregunta 1:

1. What are Machine Learning Pipelines?

   Please choose all correct answers

   ☑ A way to do feature engineering within the pipeline framework

   ☑ A way of expressing your complete end-2-end machine learning flow within a single framework with a homogeneous API

   ☑ A way of making ML algorithms run faster

   ☐ A way of speeding up ML development

Pregunta 2:

2. How is the class called which transforms a string class label to a class index in SparkML?

   ○ OneHotEncoder

   ○ VectorAssembler

   ⦿ StringIndexer

   ○ Bucketizer

Pregunta 3:

3. What is the class called which transforms a set of columns in a data frame to a single DenseVector representation in SparkML?

   ○ Bucketizer

   ⦿ OneHotEncoder

   ○ VectorAssembler

   ○ StringIndexer
